DESCRIPTION OF MARCHI 65 FLY

Marchi 65 Fly was built as one of the flagships from the traditional Marchi Boatyard in Campalto near Venice Italy. This boatyard was family owned for three generations and well known for its traditional yet high quality and modern designs with the ability to customize each model to the specifications of the individual buyer. The yard has delivered high quality crafts all over the world.

This boat was long time in its making with the hull prepared in 1996 however only finished and launched in 2001. It has since had three caring owners all having taken very good care of her ensuring a constant update on equipment and general maintenance.

The hull is made from armoured GRP with teak decks and accommodation from high quality walnut tree and matching leather upholstery in lounge, saloon and steering position.

The boat has a huge lounge area with 360 degree views and direct access to an outside veranda, a separate dining area also with 360 degree views next to the spacious inside steering position. Kitchen / Pantry well equipped with a four burner stove, micro wave, dishwasher and ample stowage forward and below the dining and steering area. Further down from here a corridor leads forward to a giant owners cabin and aft to two large guest rooms all with en suite bathrooms with a toilet, a bidet and separate shower compartments. A fourth cabin is located under the foredeck with two beds and a separate toilet with shower. Can be used for crew or teenagers.

A huge Fly deck is easily accessed from either the aft veranda or directly from the dining area from which the boat can be operated. Additional lounge area as well as stowage for the tender. The tender can easily be launched by means of the crane on the starboard side.

A Marchi is always equipped with powerful engines. This has been fitted with the exquisite Caterpillar 3412 engines that each has 1.250 HP capable of generating a speed of more than 35 knots of the more than 30 tonnes heavy boat, should you be in a hurry. These engines have been nursed and each with only just 1000 hours on the clock. The engines are easily accessed from the technical area of the boat underneath the veranda aft. Here you have easy access to the generator, the watermaker and all the various pumps and utilities. Here you also have a freezer and a washing machine.

From the veranda you have easy access to the gangway as well as to the huge aft deck and bathing platform with ample space for various watersports utilities, should you so wish.

Throughout the boat has been equipped for any occasion - please check out the extensive equipment list for further details.

This Marchi is registered in the Italian Registry and has recently completed a full underwater hull survey (The two pictures of her ashore were taken just prior to her going back into the water). Present owners has given the boat a serious update over the last years however, now need to return to Scandinavia and are looking for a new caring owner for this marvelous boat.

In case you dream of a property in the South, this is a unique opportunity to acquire such, and one that can be moved around for change of scenery or in order to move with the weather in the changing seasons.

Owner will consider a good similar sized boat situated in Denmark or northern Europe as part of the agreement. The boat will be moved to South of Spain within the coming months.

Please contact broker Michael at michael@baadagent.dk or via phone +45 2148 8880 for any further information or to arrange a view.
