DESCRIPTION OF X-YACHTS, XP 38

Xp 38 was launched in 2011 and today, 9 years later, measures the size of a super modern performance boat without compromise. The hull is constructed in strong vacuum-injected epoxy and the keel construction is constructed with carbon fiber beams. All to achieve the two most important characteristics of a sailing boat that will sail fast, light weight and strong construction. In this performance boat, X-Yachts have succeeded in both. The boat sails like a dream and thanks to an impressive sailing wardrobe and good instrumentation, with this boat you have good chances of winning on the racetrack. The cockpit has good access to all cases, bulkheads and trim lines but also good views overhead. With double carbon fiber steering wheels , you get out properly on the edge while being easy to move through the entire well between the two wheels.

Under the deck, the boat is comfortable and spacious. Xp 38 has everything you could want when it comes to the life on board. Three cabins with a total of 6 berths provide space for the whole family. The L-kitchenette is well equipped with, among other things, double hoar, gas stove with oven and microwave. In the saloon you sit comfortably around the large table and with the table in the folded position a wide passage is formed up to the front cabin.

This example is well maintained and ready for new owners. The boat has been carefully managed and stored indoors. Welcome to book a tour of this magnificent performance sailor!
Trade in´s welcome, X-35 or similar.
